Stahli USA

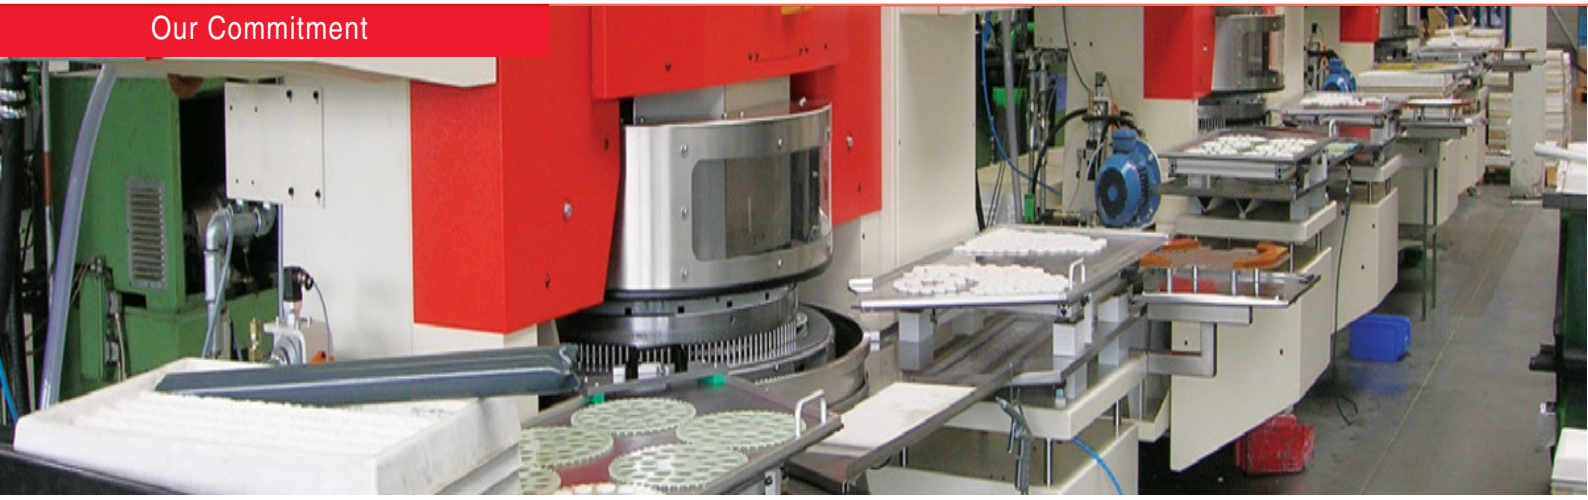

Your Partner For Field Service

Maintenance/Support – Training – Process Optimization – Research & Development

Field Service

Our Commitment

At Stahli, we prioritize delivering exceptional customer service. Our dedicated field service team supports our customers every step of the way — beginning with the initial development and setup of Stahli machines tailored to our customer's specific needs, followed by training, routine maintenance, and existing process optimization. The expertise of our Stahli engineering team ensures your operations run seamlessly.

Our experienced engineering team excels in setting up machines for lapping, grinding, and polishing a wide range of parts made from various materials. They recognize that each project demands a tailored approach, including the right process, wheels, oils, tooling, and machine customizations to achieve specific customer requirements. This deep knowledge gives our engineers a distinct advantage in creating customized machines and processes that are optimized for both quality and efficiency.

Stahli not only provides the right machine and recipe for operating our machine, but we also understand that training is essential for achieving consistent, repeatable results on the production floor. Our engineering team offers training services both after the initial machine setup and for retraining purposes. They are available to train your team in areas such as operations, maintenance, wheel dressing, and general grinding and lapping knowledge.

To ensure a machine operates smoothly and continuously, routine maintenance is essential. Our field service team is happy to schedule on-site visits or provide remote assistance to address any maintenance/support needs.

Customer service has always been a top priority at Stahli. Our customers associate the Stahli name with reliable, high-quality service. When they choose us, they're not just selecting top-tier products—they're also choosing exceptional customer support.

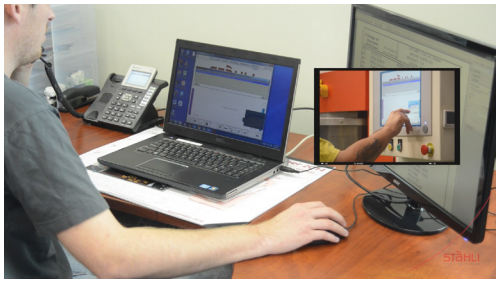

STÄHLI - Feeling for Finishing

Our Services

STÄHLI
FEELING FOR FINISHING

Maintenance/Support

- On-site Support
- Remote Assistance
- Mechanical Maintenance and Repair
- Electrical Maintenance and Repair
- Machine Software Troubleshooting and Support

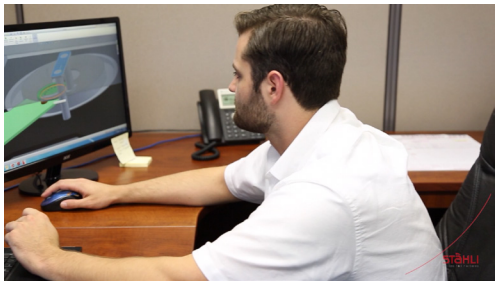

Training

- Machine Maintenance
- Machine Operator Development/Refreshers
- Basic Knowledge of Lapping and Grinding
- Wheel Dressing and Maintenance

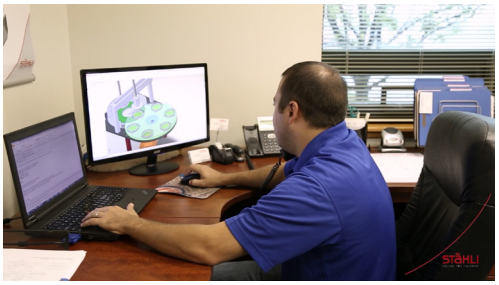

Process Optimization

- Process Development
- Wheel Selection
- Recipe Creation
- Cycle Time Reduction
- Wheel Wear Management

Research & Development

- Custom Tooling Design
- Machine Customization
- Wheel Development
- Oil Performance Analysis
- Material Assessment

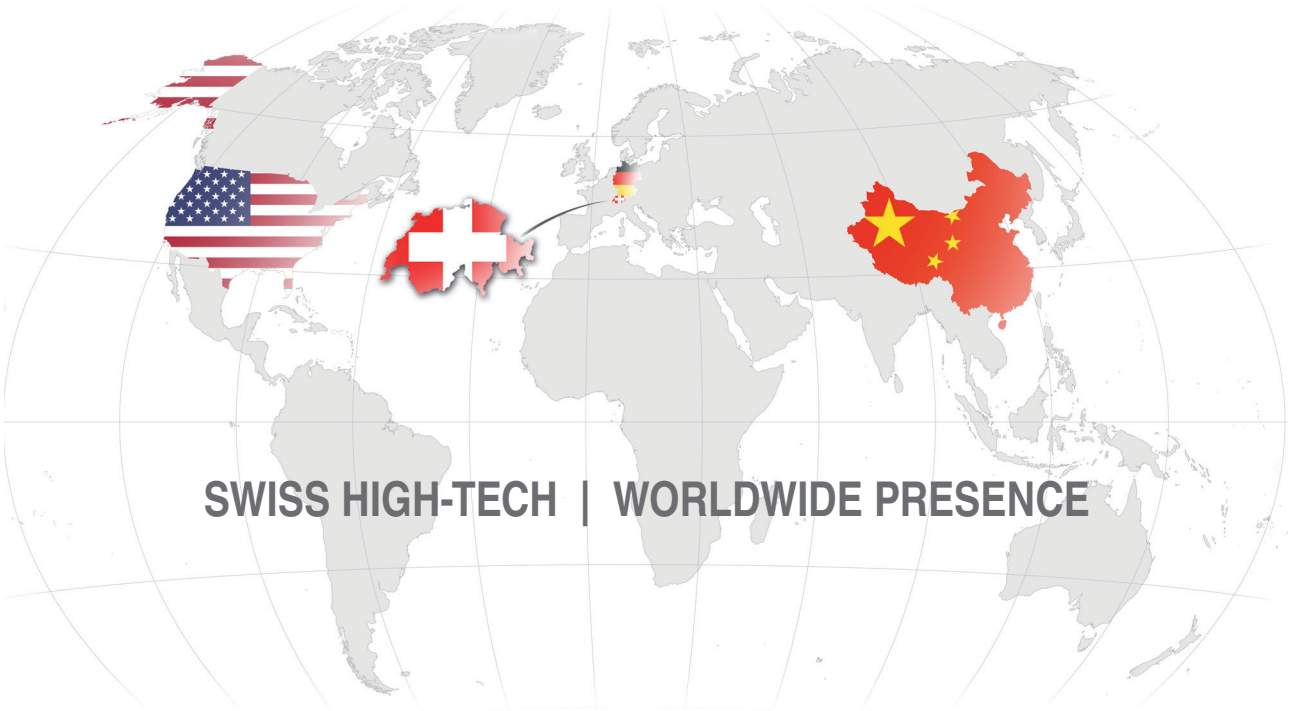

STÄHLI
FEELING FOR FINISHING

As a leading manufacturer of flat honing, lapping, and polishing machines worldwide, Stahli is recognized for both our standard and custom specialized products.

Our technical expertise stems from decades of experience, continually enriched by daily challenges in contract work and the dedication of our skilled workforce. We're eager to share our knowledge with customers through contract services, testing, and complex project studies.

Experience our innovation and reliability firsthand.
